

“Since coming to Dr. Barbour and his staff, I have seen noticeable improvement in my neck and shoulder pain. Due to their help, I have been able to get a great majority of my everyday life and hobbies back. Thank you to Dr. Barbour and his staff.” K.K.

“I began having neck problems over 30 years ago after an MVA, which caused a whiplash injury. No acute pain – just gradual and unbearable stiffness and muscle pain as the years went on. Chiropractic made it worse. Eventually, my chiropractic gave up, sent me to Dr. Barbour. My MRI showed bulging cervical discs with spurs. A consultation with the neurosurgeon resulted in him telling me that someday I would end up with surgery because the arthritis and curvature (lack of) in my neck was so bad. He said that I could “try” therapy. Long story short – that MRI was in 2006. I opted to come here three times a week for months for MMT. Tim and the old team saved me from surgery. At times, I didn’t think it was working, but talking to Dr. Barbour helped immensely. Occasionally, I have flare-ups and a couple of visits for MMT does the trick! Six weeks ago it came back with a vengeance, and then I met Sarah. Again, I was discouraged with the pain. Sarah’s expertise in MMT and sweet, caring manner has made me feel great again!” L.D.

“I had severe pain in my neck. My neck has improved considerably. I don’t have the sharp pain anymore and although there is still some tightness, I can see steady improvement.”

“My chronic neck and shoulder pain has improved since seeing Dr. Barbour. It’s taken awhile, but my activity level has increased and I’ve been able to decrease medication for pain.” T.K.

“Ever since I had my stroke, I had a stiff neck. I did three other sessions of therapy – it would go away and then come back. It’s been six weeks since my first visit here and my pain was cut in half on my first visit. By the second visit, the pain was totally gone. It has not come back yet!” H.M.

“My daughter suggested I come to a Healing Circle when my orthopaedist suggested I needed surgery to address the chronic shoulder pain that hadn’t resolved after four months of physical therapy. After the first Healing Circle treatment, I noticed a significant improvement. Each treatment that followed resulted in more and more improvement. I used to be awoken from sleep because of pain, but now I’m nearly pain free!” – M.P.

“Noel set up a program for me to do at home as well as getting therapy. [I came] here for my shoulder. I have no pain now after only four visits” – M.A.

“I came to Rehab. Specialists because I had pain in my upper arm and shoulder. I was losing the ability to raise my arm. I started PT with Noel and have had so much improvement in so little time. With his plan of treatment I have come back

to almost full range of motion. Noel has also worked on my neck to take away pain that has just been a way of life. I haven't had neck pain for over a month now. I am so grateful for the kindness and caring of Noel. He is an asset to your staff." – E.R.

"Finally after almost one year of shoulder pain, after seeing Dr Barbour for a short time I have 40% less pain now, and getting better." – M.S.

"I came to Rehabilitation Specialists because of pain and tingling in my left shoulder. This pain occurred whenever I put weight on my left arm when sitting, like when typing. After about four weeks of therapy, the pain is essentially gone. I can now work as long as I wish without pain. The therapy also helped strengthen my shoulder which was very weak from a rotator cuff injury. An operation repaired the injury a few years ago, but the shoulder was very weak. The stretching and strength training I have done under Greg's supervision has greatly improved the flexibility and strength of the shoulder. I am very pleased with the care and the results I have attained." – R.O.

". . .to my amazement the therapists . . .have helped me beyond my expectations." – K.K.

"My arms and legs don't hurt anymore!" – C.S.

"Dr. Barbour worked on my arm after I broke it. It was much straighter and more comfortable." – T.K.

"I feel a little better every day. My arm has less pain since I am in therapy." – N.E.

"Since I have had treatment my hands are better and I write more clearly, and today my headache is gone." – J.S.

"I'm here for both shoulders and wrists but getting along very well – left shoulder much better and right one coming along just fine. Wrist needs more attention but is also getting along much better." – E.S.

"One day after my first therapy appointment, my range of motion and pain in my shoulder had decreased a lot." – M.C.

"My arm and shoulder are 100% better. . . ." – E.B.

"My range of motion has increased significantly. . . ." – E.B.

"Since I am here for treatment of my shoulder and arm I am much better. I can now do my hair and clasp the necklaces." – E.N.

“Since I was not here last week for all my MMT treatments and was feeling worse. Now I have been here 2 times this week and am feeling much better.” – S.M.

“I was in pain in my shoulder blade today from basketball. Doda helped me. She cleared my pain right up.” – J.M.

“After today’s visit, I can lift my left arm. I could not lift it straight up without pain. It feels lighter and more flexible. No pain today. Wow. Thanks, Karren.” – S.H.

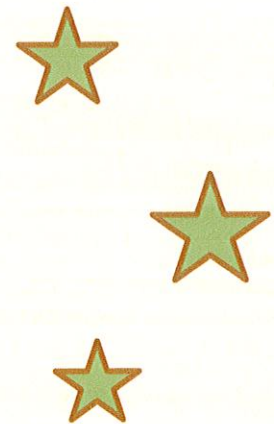

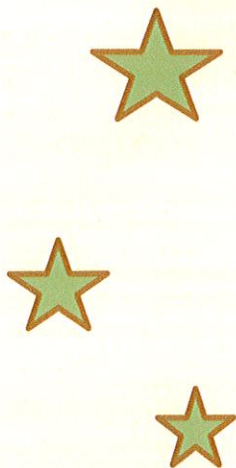

“My arm and hand was numb from the tightness in my upper back which was restricting the blood flow. After therapy and home exercise my arm stopped ‘tingling’ and feeling numb. Thank you doctor and therapists!” – E.L.

I injured my arm during the summer lifting a huge tree branch that went down during a storm. I felt something pop in my arm and it continued to ache and throb for several months.

Then Dr. Barbour worked on my arm and it felt a little better. He worked on it a second time, and the pain lessened even more. It took a total of four times of Dr. Barbour adjusting my arm for the pain to go away completely. It has never bothered me since.

Patrick Mydlarz

I have been seeing Dr. Barbour since the start of 2016 and have seen various improvements of my aches and pains, from hip-related (which was the first reason) to current right shoulder. After treatments from Dr. Barbour, my hip-related issues went completely away, with currently no pain at all. My right shoulder has seen the pain threshold lower, although movement is still an issue. On occasions, I have had back rib pain and after one treatment, it went completely away. I have recommended Dr. Barbour to friends and business associates and forwarded his information to them. Dr. Barbour is a credit and an asset to his professionalism.

Timothy Eveland

Several years ago I developed severe pain in my right arm and hand, along with numbness in my hand. A local doctor wanted to start injections in my neck for a ruptured disc. I got a second opinion from another doctor who wanted to operate on me the next day.

My wife had an appointment with Dr Barbour the next day, so when she came we explained to him my issues. He worked on me for 40 minutes.

My pain got less, I scheduled another appointment for three weeks and another a month later. During these appointments, Dr Barbour took the pain and numbness away and taught me how to live pain free.

Along with this issue he also took away my carpal tunnel in my right hand in 15 minutes.

Maureen Stanford

When I started therapy, I had severe chronic neck pain on the left side.

I was unable to turn my head to the side or bend forward without pain.

The neck pain kept me from sleeping well and awakened me when I moved.

The manipulation from Dr. Steppe helped initially, then the therapy with Noel and the rest of the staff worked wonders. Everyone I worked with was professional and helpful. The cervical traction and treatments have given me greater mobility and the pain has lessened considerably. I can move without pain and not even think about my neck issues.

I would enthusiastically recommend Rehabilitation Specialists to friends and family.

Amy Carpenter

I'd like to thank Dr. Barbour and Noel for taking me from very low quality of life (work and sleep only), to days of joining in the fun and getting to live again.

Unfortunately, I quit therapy and returned to work too hastily until the day my muscles locked up tight and I'm back to square one.

This time I gave therapy the chance it deserves, and after just over two weeks (probably longer than before), I had a breakthrough in the amount of relief I am feeling. Barb and Samantha are my angels, who dug deeper to find just what therapy to try next and I can't thank them enough. I look forward to every week getting stronger. I know I'm in the best possible hands to overcome such an overwhelming condition, one that can take away quality of life for great periods of time. Condition: pinched nerve in cervical area causes muscle spasm in my left side, head, neck, upper left back/shoulder after spinal fusion surgery.

Alice M. Brown

November 24, 2015

Dear Dr. Barbour:

This letter of thanks is long overdue, but I was waiting for your help to plateau and not continue to increase my physical abilities greatly increasing my quality of life, all while decreasing my pain from headaches, herniated disks, and multiple joint injuries. I am still getting better even though I am 17 years out from the accident and a senior by chronologic age.

My life changed forever December 4, 1998 when I was hit head on by a car passing a truck that just pulled out in front of him. The driver had a choice of running into a 6 foot ditch (on either side of the road), hitting the back of the truck, or take a chance there was no one in the other lane. He chose the latter, which I understand but deeply regret, as does my body.

My Car

My Foot was reconstructed.

As you can see the Jaws of Life were needed to extricate me. My knees were crushed by firewall; hands broke the steering wheel as I saw it coming so I braced myself on it while standing on the brakes. Do to the angle of women's leg and foot; women tend to crush their ankles, as I did, vs. men who break the bones of the lower leg as did he which heals better than the foot. Foot reconstruction was required as you can see in the photo.

Thanks to my surgeons, physical therapists and now, Dr. Barbour I am able to walk, though still use wheelchair or scooter for long stretches or on bad days, have many less headaches, less hand and arm pain, and have a greatly improved my quality of life. I am now almost able to keep up with my 6 year old grandson and amazing hubby.

Thank you for my new lease on life, improved mobility and hope to continue to improve.

Alice

When I came here I WAS using A CANE, the pain in my leg + hip was AWFUL, I even WAS in the E.R. for the pain. I WAS sent here + had Dr. Bonbour.

After 2 TREATMENTS, my cane was gone. When my hip WAS better Noel starting working on my upper back. I HAVE not been able to lift my arms behind my head for A few years. After A few TREATMENTS with Noel I CAN now put my arms over + behind my head.

All the people here are very nice + helped me a lot. Eleanore + Bank + SALLY worked with me the most.

Please write, in your own words, what your success here has been:

I injured my elbow helping my college-aged daughter move yet again 😊.
After 4 weeks of physical therapy with Bruce Diven, I am symptom-free and playing golf without pain. When treatment began I couldn't lift a paper can with out pain. Typing on the computer was painful as well. I had limited strength in my @ forearm and swinging a golf club was out of the question.
Bruce used several modalities to treat my arm including: heat, laser, massage (both manual & with a vibrator) and acupuncture. I followed his instructions for stretching and exercising at home and VOILA!
No more pain, increased strength, and I'm playing golf again!
The staff was friendly & helpful. I enjoyed talking with the PT assistants.
Thanks again for a wonderful experience!

Please write, in your own words, what your success here has been:

I am pain free and my range of motion is greatly improved. My neck and shoulder were completely locked up. Moving was painful and daily activity was almost impossible. Dr. J was able to complete an assessment and began treating me the same day. There was a real improvement from the first treatment on. Pain began to decrease and physical activity began improving slowly. Attending the healing circle weekly was important to my recovery. I attended several weeks and also had another appointment with Dr. J. Learning the stretches also assisted with the range of motion issues. The staff was caring and pleasant to work with. Thank you!

I have very bad shoulder pain. It keeps me up all night. Dr. Barbour gave me an injection in my right shoulder. He did an Awesome job injecting. It didn't hurt that bad. After about 10 days most my pain was gone! I didn't have to take any pills for pain & inflammation & I am able to sleep all night now! Thanks so so much Dr. B!

I have had severe pain in my right shoulder for five years. It got to the point where the pain continued down to my upper & lower arm. The skin on my arms and at the elbow also were over-sensitized creating much discomfort to any touch.

I saw Dr. Hirschman, D.O. in mid-August and it was discovered that I had a floating rib in my lumbar section. Within a few minutes the rib was gently manipulated into place and there was over →

An instant release in my nerves and
I experienced instant relief from the
pain. It was a miracle to me
especially since I had seen a
surgeon and he wanted to do
surgery. I fully recommend the
Center for Progressive Health and
Fitness as the alternative for
treatment before receiving surgery.
I commend both Dr. Hirschman and
Dr. Barkow for their practice
of non-invasive methods of
treatment.

SUCCESS STORY

Please write, in your own words, what your success here has been:

In August I couldn't stand the problem I was having and started to work up the pain & numbness I would have in my @ arm & hand everytime I bent my neck & head down. My Primary Doctor asked if I wanted to see Dr Barbour or another physician, I said Dr Barbour. After Dr Barbour did my exam, he ordered Manual Medicine therapy. I was skeptical, how could massage help this pain. Much to my surprise IT WORKED! The therapists have been great! I no longer have the pain or numbness every time I look down. I feel much more relaxed and don't feel like my neck is always tense. I feel like my attitude has improved because I'm not always tense and achy. I'm planning on continuing with massage even when the insurance is done.

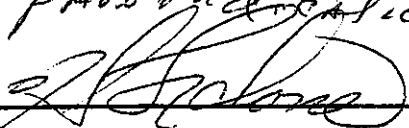

Thanks again

Success Story

Please write, in your own words, what your success here has been:

I arrived here at this office after being seen and treated by five different doctors. I had severe arm pain for over three years. This affected my work, my sleep, and my entire life style.

Since my time here I have been brought to a state of pain free, without the use of any drugs. This is extremely important to me as I work in a sensitive environment and cannot take narcotic pain medication.

Success Story

Please write, in your own words, what your success here has been:

In October 1999 I noticed my thumb was hurting a great deal. I went to a surgeon in Toledo who told me it was a strain & ordered a physical therapy sessions. The pain improved, but never went away completely. As I continued working at my job & using my thumb repetitively, the pain began to return. I was fearful I would be forced to quit a job I enjoyed. During this same time I developed some pain in my knee. I had monthly massage therapy, but there was no improvement in 1 year time. My family doctor told me to take anti-inflammatories & the pain would go away eventually. I decided to call Dr. Barbour, despite a long wait for an appointment, since he successfully cared for my husbands back injury.

The therapists were all outstanding - they each had many helpful suggestions that motivated me to take better care of myself through stretching & proper breathing. It was amazing to discover the source of my pain resulted from a tailbone injury & not simply just a thumb strain. They treated the body as a whole & therefore, found other areas that contributed to the knee & thumb pain.

The inconvenience of all the therapy sessions was definitely worth all the trouble. I feel like I have a whole new body. It's been a long time since I've worked pain free. I'm especially thankful now that I won't have to give up my job & I now have much information to stay pain free & healthy.

SUCCESS STORY

Please write, in your own words, what your success here has been:

I had taken a fall & caught myself with my left hand and arm. I didn't appear to have any injuries other than a tight shoulder but in the weeks that followed I felt progressively worse physically. My shoulder & arm hurt but I also had a cold, flu, bronchitis, sinus infection, etc just generally feeling bad. So off to Dr. B. I went. After one long session with him I felt like a new woman. It seems that fall managed to dislocate a rib or two, my clavicle among the many other things. Apparently the clavicle was also blocking the lymphatic drainage so my health was not improving until I came here. In a matter of days I was feeling like my old self.

Thanks again Dr. Barbour.

SUCCESS STORY

Please write, in your own words, what your success here has been:

I arrived at Dr. Barbour's office with extreme back, arm, neck and hand pain which had not been effectively addressed by several other physicians. With his gentle and caring work on me, Dr. Barbour relieved much of my discomfort during that first visit, and my overall condition has improved with each subsequent session.

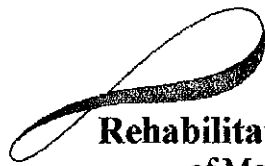

Not only has Dr. Barbour been responsible for much of my healing, he has changed the lives of so many people who had despaired of being able to live without continued pain. I am deeply grateful for the care Dr. Barbour has shown me and for the skill, gifts and healing he brings to each of his patients.

Dr. Barbour and Staff.

I came to Dr. Barbour because of pain in my shoulder and arm. I was not able to sleep on that side, do simple house hold chores, or throw a toy for the dog to chase.

Thanks to Dr. Barbour and Staff I am able to sleep without pain. It's great to be able to do simple things again. The pain is NOT there. IT IS WONDERFUL.
