

"My son came to see Dr. Barbour for cranial work. After two treatments, he was able to relax more at night and sleep better." T.R.

"I started seeing Dr. Steppe a little over a year ago. Her hands-on treatments helped get everything aligned for my surgery. Now that my surgery is done-everything is great!" C.D.

"I seem to have some improvement in my stomach. It seems as though it has loosened up and the muscles are not as tight as they once were, and my digestion is better." M.B.

"Dr. Barbour has helped me greatly over the past few years with gall bladder attacks. Thank you, doctor, I don't need surgery with your help." L.S.

"Dr. Barbour is exceptional at what he does and has helped me with my problem. I have met numerous people in his waiting room and feel like my problem is very minimal in comparison to others. The numbers of people that are in constant pain on a daily basis is staggering and thank God there are doctors like Dr. Barbour that are available to help them. Thank you so much to the staff and Dr. Barbour." – J.B.

"When I started with Dr. Barbour, I was defiant and out of control, depressed, dishonest, and wouldn't listen. Through working with Dr. Barbour, my mood improved, I tell the truth more, more honest and the outbursts of anger have greatly decreased. After each appointment, I notice usually a better mood."

"Today my jaw was so painful (it felt like a hard, tight mass and hurt to bite). It hurt to eat when I took a bite of an Arby Jr. After treatment I had a release through the neck and spine, and my jaw released to much greater ease." – K.K.

"Dr Barbour has helped my daughter so much! He has given her a quality of life that she would not have had without him. He straightens her back and helps her breathe better by relieving her asthma and allergy symptoms. No one could seem to help her until she found him. I wish Dr Barbour many blessings and a long life. My daughter is only 37 years old, so he has to live a long time!" – C.M.

"I came to Dr Barbour's office a day after a bad fall, bending my knee in a bad position. It was painful and hard to walk on. I also had been suffering from tinnitus and vertigo attacks. After seeing Dr Barbour and his team at the Healing Circle, the ringing in my ears is very much reduced along with the feeling of spinning. My knee pain is almost gone and I feel comfortable walking. He says I won't feel a think in 3 days. Thanks, Dr Barbour and Team!" – F.Z.

"I was just seen by you this past week and I just wanted to let you know how very much I appreciate you going out of your way to help me when no one else would. You don't very often meet caring and compassionate people and you, sir, are

one of the very few. It may not mean much but I wanted you to know how very grateful I am for you and your help – words cannot express. Much respect to you.” – J.M.

“I'm way better than I was before. I'm doing more.” -- R.R.

“Thank you for the wonderful treatment on Wednesday. I felt a strong connection with you (perhaps because we shared so much in common).” – S.M.

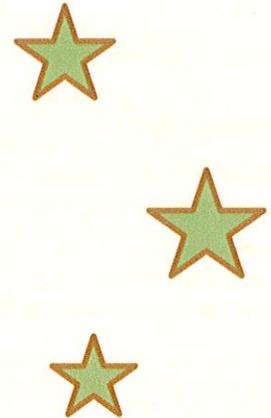

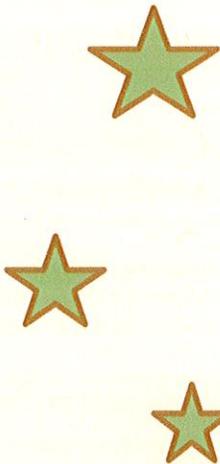

“I wanted to say thank you again for taking so much time with me in Italy. I don't know how you do it, but I sure am happy that you have the gift of healing! I did a follow-up visit with my urologist yesterday and he was shocked that his ‘treatment plan’ failed. I explained how if finished his plan on Wednesday before flying out Thursday morning and by Saturday I was very sick again. He didn't want to believe me however, I told him that he should have been treating my right kidney like I asked him to do instead of my bladder. He wanted to know how you were able to figure all of that out and treat me without all of the CT scans, x-rays and diagnostic testing of urine samples, I told him you used your hands and brain to figure it out. Funny thing is he is insisting that I get back on his treatment plan, I just said no-thanks Doc has already broke up the infection and I'm feeling fine. So Thank You very much, you made this World Championship very enjoyable and successful for me!” – R.P.

I suffer from Ringing in the Ears (Tinnitus) caused from many years of being around very loud noises (military service, work, and recreation) my whole life. It had gotten to the point where I could not be around anything at all that produced any noticeable noise (public places like restaurants). The ringing was forefront in my mind at all times – consuming my thought process.

Dr. Barbour and his staff have been a blessing to me. They, through cranial massage and adjustment, have helped tame the beast in my head. I now have been able to resume to an almost normal level of activity. I still have reduced level of the tinnitus, but it is way more manageable. I have been able to resume my lifestyle, I still stay away from any and all loud noise, wear hearing protection a lot, and my life is much richer due to Dr. Barbour and his staff. Thank you very much.

This is one doctor's office that I enjoy coming to.

For the past 2.5 years, I've been on oxygen.

Due to Dr. Barbour's treatments, I have been able to do the things I need to do with less pain and walk better. The best news is, I don't have to drag the oxygen tank around. It was a struggle to transport the tank, putting stress on my back. Dr. Barbour and his therapists are wonderful.

I have recommended family members and friends, who are currently benefitting from Dr. Barbour's care. I would encourage other people with pain or problems to come to Rehabilitation Specialists of Monroe for help.

Ronnie Reece

I have been coming to Dr. Barbour for over 20 years. I have had chronic pain and joint issues all of my adult life. I have had 15 surgeries in this time. Through Dr. Barbour's hands-on treatments acupuncture and massage, I was able to recover and keep my mobility through it all. Now with pool therapy, I am able to continue with a somewhat normal life in my activities. My pain levels were always kept to a minimum through treatment and medication. Dani, Pat, and Lisa have always gone out of their way to help and accommodate me. Jean is just wonderful also. Her talks and pats on the back have helped get me over many obstacles in life. I have personally met 2 people that travel 2 hours one way to see Dr. Barbour for fibromyalgia. That speaks for itself, that he's the best for fibromyalgia. I have recommended Dr. Barbour to several people over the years.

All have experienced help for their medical conditions.

Success Story

Joel Steiger

Before seeing Dr. Barbour 18 months ago, my last pain doctor was treating me for my pain of five years ago.

Also, he kept pushing for pain blocker shots, which I don't consider safe (have a few examples including death).

I have no cartilage in my left hip and my lower back disks have been deteriorating for many years – they're out of place, causing my back to bend front to back and left to right. They also pinch my nerves. My left knee has bursitis, torn meniscus and a Baker cyst.

I have a few other problems, but they have been fixed or cause minor pain. I have osteoarthritis. When I first came to see Dr.

Barbour, I had to walk with a 4-wheel walker or cane for short distances, like around my house. Now I can: (1) Do all my animal chores without a cane (2) When shopping and holding my arms on basket, I move twice as fast as before with minimal pain or no pain (3) When waking up I used to have a pain level over 10, I was out of balance, unstable, and fell down often. Now I wake up with a pain level of 8 and with my cane, I'm not out of balance, feel very stable, and don't fall down anymore (4) My daily hygiene activities are so much easier now (5) Last year I had to pay someone to do yardwork, this year I was able to spray round-up, weed killer, and spider spray around my porch, windows, and foundation. I can also spray my fruit trees this year and cut grass with my tractor (6) I have less trouble taking out my trash – with my cane – almost no pain (7) When unloading my car from shopping, I no longer need to back up to the porch stairs to unload my car-using the cane, I'm just fine (8) Getting the mail was slow and painful-not anymore (9) I used to sleep 5-6 hours and would get up because I hurt, now I sleep 8 hours or more without pain and can sleep on my back for the first time in six years (10) It took 20 minutes to get dressed, now it takes 5 minutes. In short, when referred to Dr. Barbour by one of his patients, it was the best thing that ever happened to me. Before I couldn't sleep or travel on foot without extreme pain, now I can sleep and foot travel with minimal to no pain and never needed a dangerous pain block shot to cover up pain. Dr. Barbour is a one of kind, marvelous, and I thank him greatly.

C. "Sue" Hudkins

When I first came to Rehabilitation Specialists I was on crutches and in so much pain, I couldn't walk. Dr. Barbour worked on me and got me off my crutches and he and my therapist got me out of pain and back on my feet again. Since then, anytime I have a problem, I see Dr. Barbour or Dr. Steppe and they always straighten me out and make me feel better. Even when I had shingles, I was in so much pain, I saw Dr. Jurkovic and she did acupuncture and my pain level went from a nine to walking out with a one! I always recommend Rehabilitation Specialists, Dr. Barbour and Dr. Steppe to anyone in pain.

Success Story

Carolyn Emerick

On January 3, 2014, I slipped and fell in a snow covered parking lot where I work, and have been off work since that time. Dr Terri Steppe has been treating my back and leg injury. I was put into therapy for one month for which workman's comp approved and paid. As I had begun to see some improvement, Dr Steppe ordered continued therapy as well as epidural injections for the pain I was in.

On behalf of Dr Steppe, Melanie Mann has worked with workman's comp over the last few months trying to get approval for continued therapy and epidural injections. Although I know it was thoroughly frustrating because they continuously gave her the run around, she worked tirelessly on my behalf. She also kept me informed on what was transpiring. Because they continuously denied the requests, I was eventually put into therapy in April, with the intent of billing it to my Blue Cross, once the billings were denied by workman's comp. Although they had repeatedly denied the requests for therapy and epidural injections, they did pay for it in the end and I believe that Melanie played a big part in that, as well as all the prayers

that went up on my behalf. I am thoroughly grateful to Melanie for going above and beyond the call of duty. She made it very apparent that she really cared about me and what I was experiencing, on both an emotional and physical level.

Dr Steppe even tried to contact one of the doctors at workman's comp, but had to leave a message. After over a month and through several phone attempts and messages left back and forth, she was able to speak to one of the doctors there, and was able to get approval for my treatment. I am extremely grateful for Dr Steppe. I don't believe there are very many doctors who would have gone to the extreme to help a patient as Dr Steppe has done. In addition to the above, Dr Steppe has called me at home on numerous occasions – in the evening and on her days off -- to see how I was doing, as my pain level had been extremely high. I can honestly say I have never know a doctor who cares more for her patients than Dr Steppe. She genuinely cares about them and will do whatever she can to help them get the treatment they need to regain their health.

The Center for Progressive Health & Wellness has been my first choice for therapy or treatment for pain. The entire staff, from doctors and assistants, therapists and assistants, receptionists, and office staff, has always been a pleasure to work with and always make you feel as though they genuinely care. Dealing with everyone in this organization has always been a "feel good" experience for me, no matter how much pain I am in.

Comfort Notheis

I came into the Center a hot mess, looking for anything to help me feel better and get my life back. I have five autoimmune diseases, a ruptured disk in my back, and tennis elbow. It was sucking the life out of me. I have a daughter who needs me, a hard job, and my doctor wanted me to be off work but I couldn't afford that. I was in pain 24-7. A friend told me about the Center; thinking it couldn't hurt, I came. After my first visit I was sore when I left but the days that followed I wasn't hurting like I did before. I had to really think about it, and after the second visit I knew this was the greatest Center ever. Now I am a firm believer that all the work that they do here has made my life much better. I feel I can play better with my daughter, not having to come home from work and just lie on the couch. This is a true life changer for me.

I can't thank the Center enough. I got my life back.

Renee Bullard

Conventional medicine could not find anything causing my breathing issues. After months of doctors, tests, & worsening symptoms, I was recommended to see Dr Barbour. When I started in September 2013, I was able to do about two hours of activity before I was exhausted and needed a nap. I felt as if someone was applying pressure around my diaphragm and I usually sounded like I had laryngitis. My goal when I started seeing Dr Barbour was to be well enough to enjoy and be active for our family vacation in December 2013. With the help of Dr Barbour and all of his staff I achieved that goal and was able to celebrate our son's 5th birthday at Disney World. By the first part of December I felt like my old self and was able to do activities effortlessly. (I had never been so excited to clean an entire bathroom in under 40 minutes.)

Although there is no term for my condition or explanation as to what or why it happened, thank you everyone here for helping me reclaim my life so I can be the mom and wife my family needs.

I have battled eczema on my hands for the past 4 years and have never been able to make much sense of why an "outbreak" occurs or why I would go into a period of remission. This Saturday (5/18), I woke up with a severe outbreak and was irritated with itching and pain to the point of tears. I was applying essential oils all day but it was a constant pain because I had forgotten my steroid cream out of town. At the end of the day (5/18) we learned the Thoracic pump and practiced multiple times on each other and in the hours after class my irritation increased and suddenly, it was gone. My eczema was still there, however, it did not wake me up in the night and Sunday morning (5/19) the redness was reduced and swelling decreased significantly. All day Sunday I had virtually NO irritation whatsoever! By

THROUGH OUT MY STRUGGLE TO MAKE MYSELF FEEL COMPLETE
 I WAS VERY FORTUNATE TO FIND THE CFRHW. THE DIFFERENCE
 IT HAS MADE IN MY LIFE IS VERY NOTICABLE. I
 FEEL I CAN BREATHE EASIER AND I WALK AROUND
 FEELING STRONGER AND TAKE THANKS TO DR. B / KAREN
 AND EVERYONE ELSE HERE I STILL HAVE MUCH TO DO
 BUT MY EXPERIENCE HERE HAS HELPED PUSH ME
 AND MY MIND / BODY / SOUL ~~IS~~ IN THE RIGHT DIRECTION.
 THANKS

When we started the exercise I could not sit down and place my feet flat on the floor. After 15 min or 20 min of the ~~the~~ introduction exercise my feet were flat on floor - especially the "Spinal stretch" I'm not sure which one did it. Amazing.

REHAB SPECIALISTS OF MONROE,

I WANTED TO TAKE A MOMENT TO THANK EVERYONE FOR THE PROFESSIONAL TREATMENT I RECEIVED.

EVERYONE THAT I WORKED WITH; MIRANDA, DR HENDERSON, LISA, JENNIFER, AND ALLISON, WERE VERY POLITE AND EXTREMELY KNOWLEDGEABLE. I LEARNED SOMETHING FROM EVERY ONE OF YOU.

I FOLLOWED YOUR INSTRUCTIONS AND MY RECOVERY WAS QUICK. THANKS FOR ALL YOUR HELP!

I've been telling "everyone" what I have been doing to get out of having carpal-tunnel surgery next week. When I mention Dr Barbour's name or say the Rehabilitation Specialists on Stewart Road I get such positive responses. I feel so encouraged. Never have I had a negative response. Even if I still must have the surgery I will go into surgery with a body that is more willing to bounce back. This was a good choice.

I have been coming here for about 9 months. I never thought I was going to get better it been a long time coming for me. I really do feel better and ~~as~~ am back to work and I am doing better and better every day. I find the home exercises very helpful and I try to do them every day. My therapist Tonya has taken a very special interest in my recovery and I feel that she is a very competent and caring Health care professional. Many times, I felt like giving up. Her continued support and care was very much appreciated. I still attend therapy, and I know one day I will fully recover. Thank so much to Tonya and Dr Barbour God Bless you.

To my dearest Doctor Barbour
I wanted you to know,
you are the only doctor
who really hears me, when
I tell you what doesn't
seem to be working well
in my body, you always
know what to do to help
me.

Last time I came to see
you, you tried something
new, you fixed things
in my body I didn't
know could be fixed.
I feel you are blessed
with the knowledge of
understanding the body,
and the gift of helping
to heal or repair us.
"I feel blessed to know this"

Thank you with love
Judy Beeson
